

Claude Code Brand Handoff

Visual identity + implementation rules + asset map

SOURCE OF TRUTH | JULY 2026

Prepared from the official Lumus brand manual, palette, templates, art-direction assets and current agency overview.

Read this first

Rules Claude Code must treat as non-negotiable

AUTHORITATIVE

The July 2026 Lumus visual identity is the authoritative system. Use the supplied first-party assets directly. Do not recreate brand marks, improvise secondary colours or silently substitute the visual language with a generic black/yellow agency aesthetic.

- Logo and brand mark: never redraw, trace, AI-generate, distort, stretch or recompose.
- Pattern: use only the supplied Primary / Negative / Monochrome files.
- Palette: use the exact final palette values in this handoff. Where older proposal pages differ, this final palette wins.
- Typography: implementation target is Cormorant Garamond + Montserrat. Do not assume supplied Acumin/Myriad files replace them.
- Imagery: low saturation + mesh/light layer + grain is a system, not an optional filter.
- If an official asset is missing: stop and request the file rather than synthesising a replacement.

SOURCE HIERARCHY

- 1 Official asset files**
SVG/PNG logos, brand marks, patterns, gradients, templates and source artwork.
- 2 Final palette file**
Palette colori.pdf / .svg exact RGB and CMYK values.
- 3 Brand manual**
Lumus Brand Manual Identity, 07.2026.
- 4 Current agency overview**
Positioning, services, audience, process, slogan and CTA.
- 5 Project-level instructions**
Rules explicitly given in this handoff for implementation and conflict resolution.

Brand foundation

Concept, meaning and current agency language

CORE CONCEPT

Guide toward light.

- The mark is built around guidance and direction.
- The letter L transforms into an arrow leading toward a four-point star.
- The star expresses light, vision and objectives.
- This concept is the design principle for the entire visual identity.

Brand words

LIGHT

REAL

CREATIVE

DIRECTION

INNOVATIVE

CURRENT AGENCY LANGUAGE

Be Seen or Be Nothing.

CREATIVE AGENCY - GALWAY, IRELAND

Branding

Web Design

Social Media Management

Motion Graphics

Ads

*Art-direction line used in visual examples:
"Where stories find light."*

POSITIONING

Lumus positions itself as a strategic partner for ambitious brands that refuse to blend in. The current overview frames the work as selective, strategy-led and outcome-driven rather than commodity production. The agency aims to close the gap between how strong a local business is in reality and how weak it may look online.

Logo system

Use the supplied master files; never reconstruct the mark

PRIMARY + PAYOFF

Logo with payoff_Primary(1).svg / .png

NEGATIVE + PAYOFF

Logo with payoff_Negative(1).png / SVG variant

PRIMARY - NO PAYOFF

Logo_Primary(1).svg / .png

BRAND MARK / PICTOGRAM

Brand Mark_Primary(1).svg / .png

SELECTION RULE

- Light backgrounds: Primary mark.
- Dark backgrounds: Negative mark.
- Institutional/corporate use: complete logo with payoff where space allows.
- Compact/avatar/icon use: standalone brand mark.
- Do not alter star placement, proportions, internal spacing or logotype/brand-mark relationship.

Technical logo rules

Legibility, clear space and prohibited transformations

CLEAR SPACE

The manual defines clear space using the four-point star as the measurement unit. Keep a constant gap from text, images and graphic elements so the logo remains clear and recognisable.

Pictogram reference

The brand-mark diagram shows $x/2$ side clearances around the pictogram, with x as the reference unit.

LEGIBILITY

The manual demonstrates successful logo reproduction at 10 mm, 30 mm, 40 mm and 60 mm. Treat 10 mm as the smallest demonstrated application; do not go below it without explicit approval.

DO NOT

- alter proportions
- change the relationship between logotype and pictogram
- apply unapproved effects or colours
- reconstruct the mark
- place it on backgrounds that reduce legibility
- AI-generate or approximate the lettering/star
- stretch, skew, outline, add drop shadows or gradients

IF THE ASSET IS MISSING, REQUEST IT.

IMPLEMENTATION CHECK

Before shipping any website, social asset, document or generated visual, confirm that the exact supplied logo file was placed as an asset layer/component. The model or image generator should never be responsible for drawing the logo.

Typography

Expressive editorial serif + functional geometric sans

Cormorant Garamond

*Editorial character,
personality and refinement.*

Montserrat

Clarity, geometry and
immediate communication.

Brand manual target: Cormorant Garamond Medium / SemiBold + Montserrat Regular / Medium, with Montserrat SemiBold used for CTA hierarchy.

Role	Font	Weight	Manual size
Hero headline	Cormorant Garamond	SemiBold	48 pt
Section headline	Cormorant Garamond	Medium	32 pt
Subheadline	Montserrat	Medium	18 pt
Body copy	Montserrat	Regular	12 pt
Navigation	Montserrat	Medium	11 pt
Button / CTA	Montserrat	SemiBold	12 pt
Caption	Montserrat	Regular	10 pt

DIGITAL RULE

Claude Code should use the actual approved Cormorant Garamond and Montserrat files/source in the project. Do not silently substitute. If the font files are unavailable, use temporary fallbacks only during development and flag the substitution before production.

Supplied project source fonts AcuminVariableConcept.otf and MyriadPro-Regular.otf exist in the asset set, but they are not a replacement for the brand typography unless explicitly approved.

Final colour system

Exact values from the authoritative palette file

CONFLICT RESOLUTION

Earlier manual proposal pages show alternative secondary values (#607B7D and #7E846B). For implementation, use the exact final palette above from Palette colori.pdf; it supersedes those proposal values when there is a discrepancy.

CODE TOKENS

```
:root {
--lumus-black: #231F20;
--lumus-yellow: #F7CA11;
--lumus-blue-grey: #8FA7B3;
--lumus-olive: #7E836C;
--lumus-cream: #F5F1E8;
}
```

Pattern system

Repeated pictogram as a modular direction language

RULES

- The pattern is created by repeating the official pictogram and amplifies the concept of guidance/direction.
- Use only the supplied Pattern_Primary(1), Pattern_Negative(1) and Pattern_Monochrome(1) assets.
- Do not redraw the tile, change its internal geometry or create a new star/arrow motif.
- Pattern should support the composition, not dominate every surface. Use it as a system element, crop, band, reveal or quiet texture.
- Use approved palette backgrounds and maintain sufficient contrast.

MASTER FILES

Pattern_Primary(1).svg / .png

Pattern_Negative(1).svg / .png

Pattern_Monochrome(1).svg / .png

Imagery creation workflow

Photography remains real; Lumus treatment changes atmosphere and direction

01

LOW SATURATION

Reduce saturation while preserving believable skin, materials and lighting.

02

MESH / LIGHT LAYER

Add the Lumus mesh/light treatment. Manual reference: opacity min. 30%.

03

GRAIN / NOISE

Add visible uniform grain. Manual reference: uniform min. 5%.

04

RESULT

Image should feel editorial, material and cinematic - never like a generic filter.

Light is a compositional element.

Use gradients, portals, curved light, haze and negative space as directional structure.

PHOTOREALISM RULE

When transforming a reference photograph, preserve its subject, framing, perspective, visual hierarchy and believable lighting logic. Lumus should be recognised through art direction - light, grain, palette, typography and composition - not by replacing the scene with unrelated generated imagery.

VISUAL_05

VISUAL_06

VISUAL_07

VISUAL_08

VISUAL_09

READ THESE VISUALLY

Recurring cues: oversized circles and curved architecture, portals, silhouettes, directional light, atmospheric haze, large negative space, low saturation, grain, cool grey-blue shadows, yellow/cream illumination and occasional warm amber/orange as a lighting/material tone.

Corporate + social applications

Use the existing templates rather than inventing new institutional layouts

SOCIAL PROFILE

The official social profile treatment uses the Lumus logo over the branded grain/gradient field and is designed to remain balanced in a circular crop.

LETTERHEAD MEASUREMENT SHEET

Header / outer margin	20 mm
Logo width	85 mm
Logo height	20 mm
Top-right brand zone	50 mm
Main writing area	230 mm
Footer band	5 mm
Footer columns	35 / 80 / 45 mm

Current agency positioning

Use this when Claude Code needs content context, not only styling

WHAT WE DO

Branding

Identity systems built to signal quality before a word is read.

Web Design

Sites engineered to hold attention and convert it into action.

Social Media Management

Content built for meaningful attention, saves and shares.

Motion Graphics

Movement with purpose.

Ads

Paid campaigns that amplify a strong brand and convert.

HOW WE WORK

01 Discover

Study business, market and competitive gap.

02 Define

Lock positioning and strategy first.

03 Create

Build brand, site and content as one system.

04 Launch

Ship, measure and refine.

WHO WE WORK WITH

Local businesses with ambition - especially owners who know the business deserves to look stronger online and are ready to invest in fixing that gap.

Restaurants

Cafés

Pubs

B&Bs & small hotels

Salons & barbers

Gyms

Takeaways

Local service businesses

OPERATING PRINCIPLES

Current overview: strategic, not transactional; selective by design; precision in every detail. The business objective is conversion and brand strength, not decoration for its own sake.

ASSET RULE

Filenames may appear both with and without “(1)” duplicates in the working folder. Prefer the current official “(1)” set listed above when available, and never use filename similarity as permission to redesign the asset.

Claude Code implementation rules

Recommended structure, tokens and component behaviour

RECOMMENDED PROJECT STRUCTURE

```
brand/lumus/

  logos/

  brand-mark/

  patterns/

  textures/

  imagery/

  templates/

  source/

  brand-tokens.css

  README-brand.md
```

Keep master SVGs untouched. Create web-optimised derivatives only when necessary, and keep them traceable to the original asset.

COMPONENT RULES

- Logo component accepts only official asset variants.
- Theme tokens use the exact final palette.
- Display type = Cormorant Garamond.
- UI/body type = Montserrat.
- Hero imagery should support light/direction/negative space.
- Pattern is a controlled asset, not generated CSS decoration.
- Add grain/mesh as image layers or controlled overlays.
- Never hide a brand mismatch behind “close enough”.

EXAMPLE CSS

```
:root {

  --lumus-black:#231F20;

  --lumus-yellow:#F7CA11;

  --lumus-blue-grey:#8FA7B3;

  --lumus-olive:#7E836C;

  --lumus-cream:#F5F1E8;

  --lumus-display:"Cormorant Garamond", Georgia, serif;

  --lumus-ui:"Montserrat", Arial, sans-serif;

}
```

Rules by medium

How the system should behave across common Lumus deliverables

WEBSITE / LANDING PAGE

Use cream/black as the structural base; yellow as light/energy accent; blue-grey and olive sparingly. Cormorant for expressive headlines, Montserrat for navigation/body/CTA. Use negative space and art-directed imagery; avoid generic SaaS gradients.

SOCIAL / STORIES

Prefer strong single ideas, editorial hierarchy and clean 9:16 layouts. Use mesh/grain atmosphere and controlled pattern. Do not over-logo or turn every story into a poster.

DECKS / PROPOSALS

Use large editorial headings, disciplined grids, Lumus yellow rules/markers and visual references. Keep slides premium and sparse. Official logos only.

CORPORATE DOCUMENTS

Start from the supplied letterhead template and measurement sheet. Preserve header/footer dimensions and corporate contacts.

IMAGE EDIT / TRANSFORMATION

Preserve the source photo first. Apply low saturation, light/mesh, grain and directional composition. Add the official logo only as a separate asset layer.

NEW IMAGE GENERATION

Generate the scene without asking the model to invent the Lumus logo. Place the official logo afterwards. Use the visual references for atmosphere, scale, portals, curves, silhouettes and light.

Reusable image-transform directive

Short operational version for Claude Code / image workflows

- 1 Use the attached image as the PRIMARY visual reference. Preserve its main subject, composition, framing, perspective, visual hierarchy, important objects and believable lighting logic.
- 2 Apply the official Lumus art direction: LIGHT · DIRECTION · VISION · REAL · CREATIVE. The result should feel cinematic, editorial, sophisticated, atmospheric, minimal and premium.
- 3 Follow the official imagery workflow: (1) lower saturation; (2) add a Lumus mesh/light layer, manual reference minimum 30% opacity; (3) add fine uniform grain/noise, manual reference minimum 5%; (4) preserve photorealism and material texture.
- 4 Use only the official palette: #231F20, #F7CA11, #8FA7B3, #7E836C, #F5F1E8. Warm amber/orange may appear as a lighting/material tone when naturally justified, not as a new brand swatch.
- 5 Where appropriate, let light become part of the composition through circular portals, curved illuminated surfaces, directional beams, haze, silhouettes and negative space. Do not force these motifs if they damage the original scene.
- 6 If text is required, use Cormorant Garamond for expressive/editorial copy and Montserrat for functional copy. Keep text short, spacious and legible.
- 7 If logo, brand mark or pattern is required, use only the official supplied asset files. Never redraw, approximate, AI-generate or alter them.
- 8 The final result must feel like an original Lumus campaign visual, not a photograph with a filter applied.

Use this directive together with the official image references and asset folder; it is not a substitute for the master files.

Brand QA checklist

Run this before anything is considered finished

- ☐ **SOURCE** Did the work use the July 2026 identity and final palette?
- ☐ **LOGO** Is the exact official logo/brand mark asset used, with correct variant and no distortion?
- ☐ **CLEAR SPACE** Is the mark separated from text/images using the manual clear-space logic?
- ☐ **TYPE** Are Cormorant Garamond and Montserrat used in the intended roles?
- ☐ **COLOUR** Are all colours from the exact final palette, with amber/orange only as image lighting if appropriate?
- ☐ **PATTERN** Is the pattern an official supplied asset rather than a recreated motif?
- ☐ **IMAGERY** Does photography retain realism while using low saturation + mesh/light + grain?
- ☐ **COMPOSITION** Is there purposeful direction, negative space and hierarchy rather than generic decoration?
- ☐ **COPY** Does messaging match the current Lumus positioning and British/Irish business context where relevant?
- ☐ **OUTPUT** Are files crisp, legible, correctly sized and free of malformed text/AI artefacts?
- ☐ **ASSET GAP** If something was unavailable, was it flagged rather than invented?

Master instruction for Claude Code

Condensed directive to paste into a project README / CLAUDE.md

- You are working on LUMUS, a creative agency based in Galway, Ireland.
- Treat the July 2026 Lumus brand identity and supplied assets as the source of truth.
- Brand concept: guidance, direction and light. The L becomes an arrow leading toward a four-point star representing light, vision and objectives.
- Primary slogan in the current agency overview: "Be Seen or Be Nothing."
- Official palette: #231F20 black, #F7CA11 yellow, #8FA7B3 cool blue-grey, #7E836C olive, #F5F1E8 cream.
- Typography: Cormorant Garamond for expressive/editorial headlines; Montserrat for body, UI, navigation and CTA.
- Never recreate, redraw, trace, AI-generate, distort or recolour the official Lumus logo, brand mark or pattern. Use the exact supplied assets. If an asset is missing, request it.
- Pattern must come from the supplied Primary / Negative / Monochrome files.
- Imagery workflow: low saturation -> Lumus mesh/light layer (manual reference min 30% opacity) -> fine uniform grain/noise (manual reference min 5%) -> photoreal final result.
- Art direction: cinematic, editorial, atmospheric, minimal, conceptual and premium. Recurring cues include portals/circles, curved architectural forms, silhouettes, directional light, haze, negative space and controlled grain.
- Avoid generic black/yellow agency layouts, Canva-style graphics, cheap gradients, oversaturated colour, excessive glow, generic SaaS aesthetics and AI-looking scenes.
- Current services: Branding, Web Design, Social Media Management, Motion Graphics, Ads. Process: Discover, Define, Create, Launch. Audience: ambitious local businesses, including restaurants, cafés, pubs, B&Bs;small hotels, salons/barbers, gyms, takeaways and local service businesses.
- Before shipping, run the Lumus QA checklist: official assets, exact palette, correct typography roles, clear space, controlled pattern, real imagery treatment, coherent hierarchy and no silent substitutions.

Source documents used

Project files that ground this handoff

Lumus Brand Manual Identity.pdf

17-page visual identity manual, dated 07.2026.

Palette colori.pdf / Palette colori.svg

Final exact RGB / CMYK palette values.

Lumus Agency Overview.pptx

Current positioning, services, process, audience, slogan and CTA.

Template_ Measurements_Lumus carta intestata .pdf

Letterhead geometry and measurements.

Template_Lumus carta intestata.pdf / .svg

Corporate letterhead implementation.

Visual_01 through Visual_09

Supplied first-party art-direction references.

Official logo / brand mark / pattern files

Primary, Negative, with-payoff, standalone and monochrome variants.

layer gradient*, texture stories(1).psd

Official gradient/noise/texture system assets.

Lumus_source_files.ai

Official source artwork file.

IMPLEMENTATION NOTE

This PDF is a handoff and operating specification. It does not replace the original master assets. Claude Code should be given this PDF together with the brand asset folder whenever it needs to produce production-ready Lumus work.

Document rendering note: this handoff itself uses available embedded/system type for reliable PDF output. The production brand typography remains Cormorant Garamond + Montserrat as specified above.
